## FARMER COOPERATIVE SERVICE U. S. DEPARTMENT OF AGRICULTURE WASHINGTON, D. C.

Joseph G. Knapp, Administrator

The Farmer Cooperative Service conducts research studies and service activities of assistance to farmers in connection with cooperatives engaged in marketing farm products, purchasing farm supplies, and supplying business services. The work of the Service relates to problems of management, organization, policies, financing, merchandising, product quality, costs, efficiency, and membership.

The Service publishes the results of such studies; confers and advises with officials of farmer cooperatives; and works with educational agencies, cooperatives, and others in the dissemination of information relating to cooperative principles and practices.

## PREFACE

This report is prepared annually to meet many requests from cooperatives, other supply firms, land-grant universities, and other agencies for information on farmer expenditures for supplies and equipment. Many find the data useful in conducting market research and in determining trends in expenditures on a State and regional basis.

The following tables were compiled by Farmer Cooperative Service from basic data on production expenditures of farm operators developed by the Farm Income Branch, Economic and Statistical Analysis Division, Economic Research Service, U. S. Department of Agriculture. Such expenditures were presented in preliminary form in the July 28, 1965, issue of The Farm Income Situation, FIS-199. Revised figures will be published in the corresponding issue in 1966. These data did not include family farm living expenditures.

In preparing estimates of cash expenditures for production supplies and equipment from these data, we excluded estimates of amounts spent for nonsupply items (including livestock, taxes, interest, labor, and various services) used in farm production. The basis for excluding specified items is included in the footnotes to table 1. State data appear in table 2. The total expenditures for nonsupply items for the United States only appear in appendix table 1.

Although we made estimates for some items from limited data, these were based on the best information currently available. Note that expenditures for petroleum do not include fuel oil used in farm homes nor gasoline used in automobiles operated for farm family living purposes. (See footnote 5, table 1).

J. Warren Mather, Chief Farm Supplies Branch

1-15/ See page 2 for footnotes for this table.

Source of Data: Farm Income Branch, Economic Research Service, U. S. Department of Agriculture. Excludes estimates of farmers cash expenditures for nonsupply items used in farm production. (See table 2.) Excludes all farm family living expenditures.

Note: Cash expenditures by farmers for nonsupply items were \$12,572 million in 1964. (See appendix table 1.) Thus, total cash expenditures for both supply and nonsupply items by U. S. farm operators for production purposes totaled \$19,333 million in 1964. If "depreciation" rather than "cash expenditures" for capital items is used in computing net income of farm operators, "production expenditures," plus other minor changes, total \$29,249 million in 1964.

Cash expenditures for production supplies and equipment accounted for 57.1 percent of total cash expenditures for all production items (including supply and nonsupply items) in 1964.

Cash receipts from farming totaled \$36,899 million in 1964. Cash expenditures for production supplies and equipment, therefore, were equivalent to 45.4 percent of cash farm receipts.

Total cash expenditures for all farm production items, including supply and nonsupply items accounted for 79.5 percent of cash receipts from farming in 1964.

See Farm Income Situation, July 28, 1965, Economic Research Service, U. S. Department of Agriculture.

The state of the second second

## Footnotes for Table 1

- 1/ Includes feed grains, hay and roughage, and pasture purchased by one farmer from another farmer estimated at perhaps 10 percent of the total. Does <u>not</u> include feed charged to farmers at stockyards. Definition of feed expenditures in 1959 by Census Bureau on which these were based: "Expenditures on feed purchased for livestock and poultry were to include expenditures for grain, hay, mill-feeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm was also to be included. Payments made by tenant to his landlord for feed grown on the tenant farm were to be excluded."
- 2/ Includes seed transactions among farmers estimated at 10 percent of total.
- $\underline{3}/$  Includes items similar to those listed in following definition by Census Bureau in 1959 on which these estimates were based: "Fertilizer was to refer only to commercial fertilizer and fertilizing materials, including rock phosphate." No specific mention was made of basic slag. Barnyard manure, straw, refuse materials, and soil conditioners were to be excluded.
- 4/ Includes expenditures only on farm operator's dwellings, service buildings, and other structures. Includes wiring materials, plumbing equipment, fences, windmills, wells, and dwellings not occupied by the farm operator. Excludes labor estimated at 24 percent of total expenditures for repairs and maintenance of farm buildings.
- 5/ Includes only 40 percent of petroleum products used in farm automobiles as amount attributed to farm business use; excludes the remaining 60 percent as amount attributed to farm family living expenditures. Based on definition as used by Census Bureau in 1959: "Expenditures for gasoline and other petroleum fuel and oil were to relate only to the products used in the farm business. They exclude the cost of petroleum products used for the family automobile when operated for other than farm business purposes and of products used in the farmhouse for heating, cooking, and lighting."
- 6/ Includes only 40 percent of total operating costs of farm automobiles as amount attributed to farm business. Excludes labor estimated at 32 percent of repair expenses for automobiles, 34 percent for trucks, and 62 percent for tractors. Also excludes insurance and license fees. Tires, tubes, and tire repair were estimated to be 20 percent of U.S. total expenditures for repair parts, tires, tubes, tire repairs, and batteries.
- 7/ Excludes labor estimated at 44 percent of total repair business.
- 8/ Includes blacksmithing and horseshoeing expense.
- 9/ Pesticides do not contain about \$55 million of livestock sprays and disinfectants. These are included in veterinary medicines and supplies.

  10/ Excludes veterinary fees of about 30 percent of total expenditures for veterinary services. Includes livestock sprays and disinfectants of about \$55 million.
- 11/ Excludes dairy equipment. It is in "other machinery and equipment."
- 12/ Compiled by Farmer Cooperative Service as follows: The ratio of U. S. total "farm depreciation and other farm capital consumption" to the U. S. total "gross farm capital expenditures" was applied to the State data on "depreciation and other farm capital consumption." (In 1965, the Economic Research Service revised U. S. gross farm capital expenditures from 1930 to date. This reduced expenditures on most years for buildings and increased those for farm machinery and equipment.)
- 13/ Includes expenditures for new construction, additions, and major improvements on farm operator's dwellings, service buildings, and other structures. Includes wiring materials, plumbing equipment, fences, windmills, wells, and dwellings not occupied by farm operators. Excludes labor estimated at 24 percent of total.
- 14/ Includes only 40 percent of expenditures for farm automobiles as amount attributed to farm business.
- $\frac{15}{\text{(table 2)}}$  total \$4,897,662 compared to \$4,655 million for depreciation and other consumption from accidental damage of farm capital in 1964.

| Total.,   |   | 4,887,000    |
| Miscellaneous current operating expenses:         |   |              |
| Fire, wind, and crop hail insurance               |   | 177,695      |
| Veterinary fees 2/                                |   | 69,917       |
| Hired hauling of milk                             |   | 160,442      |
| Ginning   |   | 254,873      |
| Crop insuranceFCIC                                |   | 9,837        |
| Tolls for sugar cane and sorgo syrup              |   | 2,196        |
| Short-term interest on non-real-estate debts      |   | 1,021,925    |
| Electricity                                       |   | 166.601      |
| Grazing permits                                   |   | 11,248       |
| Irrigation  |   | 115,245      |
| Telephones  |   | 129,926      |
| Marketing livestock charges                       |   | 125,668      |
| Total   |   | 2,245,573    |
| Repairs and operation of capital items:           |   |              |
| Labor for repair of motor vehicles 3/             |   | 539,260      |
| Insurance and license fees for motor vehicles     |   | 242,000      |
| Labor for repair of other farm machinery 4/       |   | 229,805      |
| Labor for repair of buildings 5/                  |   | 157,252      |
| Total   |   | 1,168,317    |
| Total cash farm operating expenses                |   | 8,300,890    |
| Other cash farm expenditures:                     |   |              |
| Taxes on farm property.                           |   | 1,834,000    |
| Interest on farm mortgage debt                    |   | 948,000      |
| Net rent to nonfarm landlords                     |   | 6/ 1,200,000 |
| New capital itemslabor for new buildings 7/       |   | 293.040      |
| Total   |   | 4,275,040    |
| Grand totalall services and other nonsupply items |   | 12,575,930   |

Source of Data: Farm Income Branch, Economic Research Service, U. S. Department of Agriculture. Excludes estimates of farmers cash expenditures for supplies and equipment used in farm production (see table 1).

Note: Cash expenditures for farm supply and equipment items were \$16,758 million in 1964 (see table 1). Thus, total cash expenditures for both supply and non-supply items by U. S. farm operators for production purposes totaled \$29,333 million in 1964. If "depreciation" rather than "cash expenditures for capital items" is used in computing net income of farm operators, "production expenditures," plus other minor changes, totaled \$29,249 million in 1964. See Farm Income Situation, July 28, 1965. Economic Research Service, USDA.

- 1/ Includes cash wages and Social Security taxes paid by employers. ("Hired labor" in Economic Research Service's data on "current farm operating expenses" was \$2,708 million because perquisites were included.)
- 2/ Estimated to represent 30 percent of total for medicines and service fees.
- $\underline{3}/$  Of "total expense for parts, tires, and labor" estimated labor expense accounted for 32 percent for automobiles, 34 percent for trucks. and 62 percent for tractors.
- 4/ Estimated to represent 44 percent of total for parts, tires, and labor.
- 5/ Estimated to represent 24 percent of total for building materials and labor.
- $\underline{6}/$  Net rent was \$1.094 million in ERS table on "production expenses of farm operators" because of difference in handling landlords' share of total expenditures rather than depreciation on farm buildings.

7/ Labor estimated to represent 24 percent of total for building materials and labor used in new construction, additions, and major improvements for farm operator's dwellings, service buildings, and other structures. Includes fences, windmills, wells, and dwellings not occupied by the farm operator.

Tables by ERS on "production expenses of farm operators" include depreciation on motor vehicles, farm machinery, and buildings rather than cash expenditures for such items.
